Registered in the United Arab Emirates · Operating across KSA, the GCC & Middle East

INSIDE THIS EDITION

5 new practice areas

Artificial Intelligence

Practical AI fluency for every level of the organization
· 6 programs

Cybersecurity

Governance, compliance and advanced security leadership · 3 programs

Data Analysis

From spreadsheets to enterprise-grade analytics platforms · 9 programs

Data Management

Governance, compliance and stewardship for enterprise data · 3 programs

Productivity & Digital Tools

Everyday tools, mastered — from Excel to low-code apps · 9 programs

Artificial Intelligence

Practical AI fluency for every level of the organization

AI & ML Fundamentals for Business Growth

Basic

Demystifies AI and machine learning for professionals with no technical background. Participants learn to tell traditional AI, machine learning, and generative AI apart, spot practical use cases across their industry, and evaluate where AI can responsibly create value for the business.

Marketing Executives · Operations Managers · Entrepreneurs

Strategic AI: A Guide for Leaders and Managers

Basic

Equips leaders to sponsor AI adoption with confidence — assessing organizational readiness, building the business case and ROI for AI initiatives, establishing governance and risk guardrails, and leading teams through AI-driven change.

Department Managers · Senior Executives · Business Unit Heads

GenAI and Effective Prompt Engineering

Basic

A practical, non-technical introduction to generative AI and the craft of prompting. Participants learn to write clear, structured prompts, refine outputs through iteration, and evaluate AI responses for accuracy and bias before folding them into daily work.

Executive Assistants · Marketing Executives · HR Officers

Artificial Intelligence · continued

Microsoft Certified: AI Business Professional (AB-730)

Basic

A certification-track program preparing professionals to put Microsoft Copilot to work — configuring agents, applying responsible-AI and data-protection practices, and using AI to draft, analyze, and manage everyday business documents.

Executive Assistants · Marketing Executives · Project Coordinators

Microsoft Certified: AI Transformation Leader (AB-731)

Basic

Prepares business leaders to translate AI's potential into an institutional transformation plan — identifying high-value use cases, understanding Microsoft's AI ecosystem, and charting a responsible path to enterprise-wide adoption.

Department Managers · Transformation Managers · Senior Executives

Microsoft 365 Copilot: Boosting Daily Productivity

Basic

Hands-on training in using Copilot across Word, Outlook, Teams, and PowerPoint to draft documents, summarize meetings and emails, and build presentations faster — turning AI into a daily habit rather than a novelty.

Administrative Officers · Executive Assistants · Project Coordinators

Cybersecurity

Governance, compliance and advanced security leadership

Cybersecurity & NCA Fundamentals for the Workplace

Advanced

Builds working command of Saudi Arabia's Essential Cybersecurity Controls (ECC) — mapping enterprise systems against ECC domains, running gap assessments, and preparing the governance and documentation NCA audits require.

Compliance Officers · IT Security Officers · Risk Managers

Certified Information Security Manager (CISM)

Intermediate

Prepares information security professionals for strategic leadership — building governance frameworks, managing enterprise risk, designing incident response capability, and aligning security strategy with business goals.

Information Security Managers · Risk Managers · CISOs

Certified Information Systems Security Professional (CISSP)

Advanced

An advanced program for senior security professionals covering secure architecture design, identity and access management, security assessment and testing, and embedding security across the software development lifecycle.

CISOs · Security Architects · Senior Security Engineers

Data Analysis

From spreadsheets to enterprise-grade analytics platforms

Data Literacy: Making Informed Business Decisions

Basic

Builds the foundational data confidence every professional needs — recognizing data types, understanding what quality data looks like, catching common entry errors, and preparing data that decision-makers can trust.

Operations Officers · **Finance Officers** · **HR Officers**

Excel Data Analysis: Driving Business Insights

Basic

Moves participants from basic spreadsheets to real analysis — using formulas to clean data, lookup functions to match records, PivotTables to summarize results, and simple dashboards to present findings clearly.

Financial Analysts · **Sales Coordinators** · **Operations Officers**

Power BI Essentials for Business Professionals

Basic

An introduction to Power BI as a business tool — connecting to data sources, cleaning data with Power Query, writing basic DAX calculations, and publishing dashboards that reflect real operations.

Financial Analysts · **Sales Managers** · **Business Analysts**

Data Analysis · continued

Tableau for Business: Analyzing and Visualizing Data

Basic

Develops practical Tableau skills for turning raw data into decision-ready visuals — connecting data sources, building calculated fields, choosing the right chart for the story, and sharing interactive dashboards with stakeholders.

Business Analysts · Marketing Executives · Finance Officers

Microsoft Azure Data Fundamentals (DP-900)

Intermediate

Introduces core data concepts across cloud platforms — structured versus unstructured data, relational databases and basic SQL, non-relational options like Cosmos DB, and batch versus real-time processing on Azure.

IT Support Specialists · Database Administrators · Junior Data Analysts

Microsoft Certified: Power BI Data Analyst Associate (PL-300)

Advanced

A certification-track program for experienced Power BI users — advanced data modeling, DAX measures including time intelligence, Copilot-assisted report building, and secure workspace management.

BI Analysts · Power BI Developers · Data Analysts

Data Analysis · continued

Advanced Power BI: Complex Analytics for Professionals

Advanced

Pushes Power BI skills into advanced territory — complex DAX patterns, time intelligence comparisons, model optimization, and diagnosing performance issues before reports go live.

BI Analysts · Power BI Developers · Senior Data Analysts

Microsoft Fabric: Unified Data Analytics

Advanced

Introduces Microsoft's unified analytics platform — building a Lakehouse, designing data pipelines for ingestion, querying raw data through notebooks, and connecting it all back to Power BI for reporting.

BI Analysts · Data Analysts · IT Solutions Specialists

Open Data: from Management to Analysis

Basic

Builds capability to work with open data initiatives — understanding standards and licensing, navigating national and enterprise data portals, judging dataset quality, and extracting insights that inform policy and business decisions.

Government Relations Officers · Policy Analysts · Research Officers

Data Management

Governance, compliance and stewardship for enterprise data

Data Management Fundamentals for Enterprise Value

Basic

Introduces data as a strategic asset — defining governance roles and responsibilities, understanding the data lifecycle, applying quality standards enterprise-wide, and spotting the risks that undermine trust in data.

Data Governance Officers · **Business Analysts** · **IT Officers**

NDMO & PDPL Compliance: Securing Corporate Data

Intermediate

A focused compliance program covering Saudi Arabia's NDMO governance standards and PDPL privacy law — classifying enterprise data correctly, respecting data-subject rights, and understanding the exposure of non-compliance.

Data Protection Officers · **Compliance Officers** · **Legal Officers**

Certified Data Management Professional (CDMP)

Intermediate

A certification-track program built on the DMBOK2 framework's eleven knowledge areas — governance, data quality, metadata, master data management, architecture, and the ethics of data-driven decisions.

Data Governance Officers · **Data Analysts** · **Data Stewards**

Productivity & Digital Tools

Everyday tools, mastered — from Excel to low-code apps

Excel Skills for Business: Essentials

Basic

Core spreadsheet skills for daily professional work — building and formatting workbooks, applying basic formulas and functions, creating simple charts, and preparing files for clean, professional sharing.

Administrative Officers · Finance Officers · Sales Coordinators

Excel Skills for Business: Intermediate

Intermediate

Builds on the essentials with VLOOKUP and INDEX/MATCH, advanced PivotTables and PivotCharts, data validation and What-If analysis, and secure collaboration on shared workbooks.

Financial Analysts · Business Analysts · Operations Officers

Excel Skills for Business: Advanced

Advanced

For power users ready to build serious analytical models — importing and merging large datasets with Power Query, connected data models with Power Pivot, DAX measures, and interactive dashboards inside Excel itself.

Senior Financial Analysts · Finance Managers · Reporting Specialists

Productivity & Digital Tools · continued

PowerPoint: Designing High-Impact Presentations

Intermediate

Moves presentations from slides to storytelling — structuring a persuasive narrative, applying visual design principles, simplifying complex data into clear visuals, and building on-brand templates that hold attention.

Marketing Executives · Sales Managers · Executive Assistants

Microsoft 365 Mastery: Essential Workplace Productivity

Basic

A broad foundation across Word, Excel, PowerPoint, Outlook, and Teams — formatting documents, entering data, building simple presentations, managing correspondence, and collaborating more effectively as a team.

Administrative Officers · HR Officers · Entry-Level Employees

Microsoft Power Automate: Automate Business Process

Intermediate

Teaches participants to design automated workflows for repetitive tasks — desktop flows for Windows and browser processes, cloud flows built on triggers and connectors, and monitoring automations once live.

Business Process Analysts · Operations Officers · IT Solutions Specialists

Productivity & Digital Tools · continued

Power Apps: Building Custom Business Solutions

Intermediate

Introduces low-code app building — designing interfaces in Power Apps Studio, connecting to data sources like Dataverse and Excel, writing simple formulas to control app behavior, and publishing apps for team use.

Business Analysts · Operations Officers · Process Improvement Officers

Microsoft Power Platform Fundamentals (PL-900)

Intermediate

A fundamentals-level overview of Microsoft's automation and app-building ecosystem — Power Apps, Power Automate, and Power Pages — and how they combine to digitize business processes without heavy engineering.

Business Analysts · IT Solutions Specialists · Operations Officers

MS Project: Streamlined Project Management

Basic

Practical training in Microsoft Project for planning and tracking work — building schedules and milestones, sequencing tasks, formatting Gantt charts, allocating resources, and reporting progress.

Project Coordinators · Project Managers · Team Leaders

Let's Build Your H2 2026 Training Plan

Whether you're closing capability gaps or getting ahead of what's next, our team can help you select the right mix of programs from this catalog and the full 2026 edition.
